

Connecting to Guest Wifi Network – iOS (Apple Devices)

This network has limited internet access along with content filtering. Gaming and social media are some of the content filtering not permitted. Accept terms before gaining access to the network.

1. To connect to a wifi network, go to your Settings.  Then tap on Wifi 

2. In your wifi settings, under Choose a Network, you'll see a list of available networks. Select the network with Guest in the name. The Guest networks are for the personal devices of visitors that do not have employee or student accounts.

3. When you connect to the network, you will be asked to agree to the terms. Click on Continue to the Internet.
