

Personal device connecting to wifi – iOS (Apple Devices)

Students and employees who want to use their personal mobile devices will need to logon to the wireless network and accept terms before gaining access to the network.

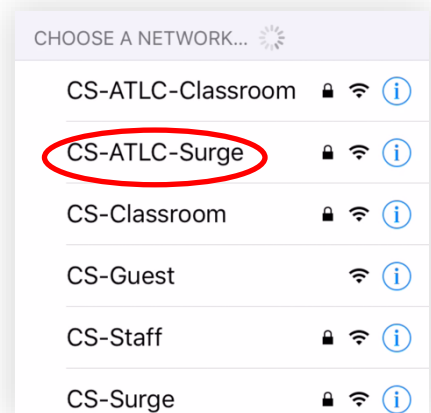

1. To connect to a wifi network, go to your Settings.

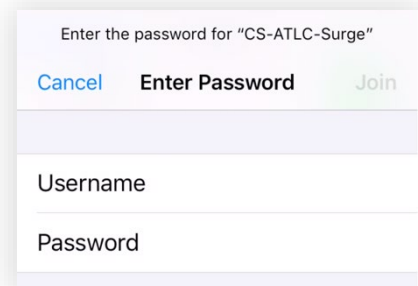

Then tap on Wifi

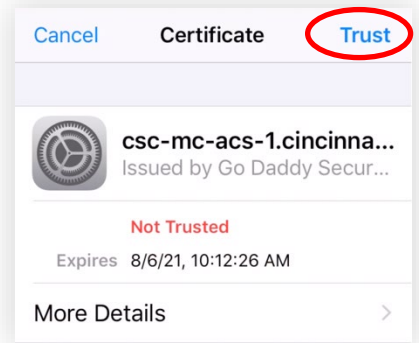

2. In your wifi settings, under Choose a Network, you'll see a list of available networks. Select the network with Surge in the name. The Surge networks are for the personal devices of employees and students with network accounts.

3. After you select the Surge network, you'll be asked to sign in. Use your CState username and password to sign in.

4. After signing in, you need to trust the certificate. To trust the certificate, tap on the word Trust in the upper right corner.

5. After trusting the certificate, you will be asked to agree to the terms. Click on Continue to the Internet to fully connect.
